EXPERIENCE

AI Engineer & Co-Founder · LLMify AG

Oct 2025 – Present · Cham, CH

Sovereign AI infrastructure for Swiss companies: open-source models, on-premise & Swiss cloud.

- **AI Learning Coach** for Entlastungsdienst Bern: multi-agent system for scenario-based competency assessment, personalised learning paths, interactive training (quizzes, role-play, case studies), and a confidential reflection space. Delivered in 14 weeks; hosted in CH/EU with Microsoft Entra ID & Azure AI Foundry.
- **Sovereign AI Platform:** co-developed and rolled out an on-premise / Swiss-cloud platform for open-source LLMs, deployed across multiple client industries. Ran strategy workshops, set up demo environments, configured hardware and software.
- Semi-finalist, **GenAI Awards 2026**.

AI / ML Engineer · Unit8

Mar 2024 – Sep 2025 · Zurich, CH

Data science & AI consultancy. LLM & data engineering for clients in tech, finance, and energy.

- **Text-to-Data Chatbot (major US tech company):** multi-agent analytics system for querying business and sales data in natural language; identified the correct database, executed queries, generated grounded answers and dynamic charts.
- **Data Quality Monitoring (Swiss energy company):** end-to-end anomaly detection pipeline for operational data built on Spark, with automatic alerting; led stakeholder requirements workshops and a comparative evaluation of candidate solutions.
- **LLM Due Diligence Assistant (Swiss asset manager):** semantic document retrieval system for due diligence workflows; AI-powered lookup with full source traceability, every answer linked to its origin document.

Researcher · University of Amsterdam

Aug 2022 – Mar 2023 · Amsterdam, NL

Part of the ARC-INTREPID project, an adversarial collaboration between three leading neuroscientific theories of consciousness.

Data Scientist · Unit8

Apr 2020 – Feb 2022 · Zurich, CH

- **Darts:** core contributor to an open-source Python time series library (JMLR 2022); the GitHub repo grew from 0 to 3.3k+ stars. Presented at EuroPython 2021 and PyData Global 2021.
- ML-based predictive maintenance tool for a Swiss hydro power plant: EDA, model development, backtesting, and deployment.
- Demand forecasting solution for a Swiss industrial equipment manufacturer; improved forecasts by 10–50% across metrics.

Machine Learning Engineer · Araneum Technologies

Sep 2019 – Dec 2019 · Zurich, CH

Devised and built machine learning solutions for small and medium-sized Swiss banks.

EDUCATION

MSc Neural Systems & Computation · ETH Zürich & University of Zürich

2020 – 2022

- Thesis on bio-inspired continual learning; maximum grade. Published in *Biological Cybernetics*.
- Founded a student reading group on consciousness science; conducted interviews with researchers including Anil Seth.
- GPA 5.8 / 6

BSc Computer Science · ETH Zürich

2016 – 2020

- Exchange semester at the University of Pennsylvania (Wharton & CS); awarded scholarship for a selective exchange program.
- GPA 5.36 / 6
