EXPERIENCE

- AI Engineer & Co-Founder · LLMify AG** Oct 2025 – Present · Cham, CH

Sovereign AI infrastructure for Swiss companies: open-source models, on-premise & Swiss cloud.

 - AI Learning Coach** for **Entlastungsdienst Bern**: multi-agent system for scenario-based competency assessment, personalised learning paths, interactive training (quizzes, role-play, case studies), and a confidential reflection space. Delivered in 14 weeks; hosted in CH/EU with Microsoft Entra ID & Azure AI Foundry.
 - Sovereign AI Platform**: co-developed and rolled out an on-premise / Swiss-cloud platform for open-source LLMs, deployed across multiple client industries. Ran strategy workshops, set up demo environments, configured hardware and software.
 - Semi-finalist, **GenAI Awards 2026**.
- AI / ML Engineer · Unit8** Mar 2024 – Sep 2025 · Zurich, CH

Data science & AI consultancy. LLM & data engineering for clients in tech, finance, and energy.

 - Text-to-Data Chatbot (major US tech company)**: multi-agent analytics system for querying business and sales data in natural language; identified the correct database, executed queries, generated grounded answers and dynamic charts.
 - Data Quality Monitoring (Swiss energy company)**: end-to-end anomaly detection pipeline for operational data built on Spark, with automatic alerting; led stakeholder requirements workshops and a comparative evaluation of candidate solutions.
 - LLM Due Diligence Assistant (Swiss asset manager)**: semantic document retrieval system for due diligence workflows; AI-powered lookup with full source traceability, every answer linked to its origin document.
- Researcher · University of Amsterdam** Aug 2022 – Mar 2023 · Amsterdam, NL

*Part of the **ARC-INTREPID project**, an adversarial collaboration between three leading neuroscientific theories of consciousness.*
- Data Scientist · Unit8** Apr 2020 – Feb 2022 · Zurich, CH
 - Darts**: core contributor to an open-source Python time series library (JMLR 2022); the **GitHub repo** grew from 0 to 3.3k+ stars. Presented at **EuroPython 2021** and **PyData Global 2021**.
 - ML-based predictive maintenance tool for a Swiss hydro power plant: EDA, model development, backtesting, and deployment.
 - Demand forecasting solution for a Swiss industrial equipment manufacturer; improved forecasts by 10–50% across metrics.
- MSc Neural Systems & Computation · ETH Zürich & University of Zürich** 2020 – 2022
 - Thesis on bio-inspired continual learning; maximum grade. Published in *Biological Cybernetics*.
 - Founded a student reading group on consciousness science; conducted interviews with researchers including Anil Seth.
 - GPA 5.8 / 6
- BSc Computer Science · ETH Zürich** 2016 – 2020
 - Exchange semester at the University of Pennsylvania (Wharton & CS); awarded scholarship for a selective exchange program.
 - GPA 5.36 / 6
